

Instructions

Task

Make a pixel perfect conversion for the given template by following below instructions:

1 .Header

Design the header and show the mega menu.

2. Hero Banner

There will be three images in the slider. Images will change automatically in a certain time, but user can also change images by clicking on the three dots. Please try to use a smooth zoom effect in starting every slider.

3. About Us

It will be a carousel, user can change by clicking on the arrow icon. Image and text will be changed for each sliding items. Please check the first and second screen for getting idea.

4. Projects

Design the project section and show the hover effect.

5. Blog

Blog section will be on scroll slide. Please keep 4-5 blogs to slide. User can not go to the next section before completing the section.

5. Our Branches

This will be an interactive map. User can see branch locations by clicking on the map marker points.

You can skip any of the sections if you want.

Stack

React, Tailwind

Deadline: 4 days from receiving the task

How to submit
